Introduction: Yoga improves strength, balance and flexibility. Slow movements and deep breathing increase blood flow and warm up muscles, while holding a pose can build strength. Yoga is an ancient practice that involves physical poses, concentration and deep breathing. A regular yoga practice can promote endurance, strength, calmness, flexibility and well being. Yoga is now a popular form of exercise around the world. Yoga as a practice has innumerable benefits that positively affects an individual both physically and mentally. Hence our education department has decided to conduct an Add on course programme for the students of our department and other departments so that they can learn the opportunities of Yoga.

Importance of Yoga:

The strengthening and lengthening effects of yoga can improve mobility and function, helping the body to recover from physical injury and the benefits for mental health can lead to improved sleep patterns and enhanced wellbeing, greatly improving your quality of life.

About the programme:

Apart from physical benefits, the incorporation of meditation and breathing yoga practices can help improve our mental well-being. Practising yoga regularly can create mental clarity and calmness, increase awareness, relieve chronic stress, relax our mind and dramatically improve our concentration. These benefits make us realise its benefits. Hence we call a yoga Guru from Vivekananda Kendra Numaligarh, for this programme. –

Conclusion:

Students can learn a lot from the programme. According to the National Centre for complementary and Integrative Health, Yoga is an ancient practice based on the philosophy of promoting physical and mental health that began more than 4000 years ago. Regular asanas helps discipline the mind and body, creating more balanced individuals who are able to take an active part in every day life. It helps reducing stress, improves focus and reduces the risk of various health conditions that occur due to improper diet and poor lifestyle choices. Moreover yoga and meditation do not have any side effects if done properly and under the guidance of an experienced professional.

Certificate from Assistant Director of Sericulture Golaghat.

Summary of the project:

certified
15/2/21

Muga Silk is native of Assam and named after Assamese word "Muga" which indicates the amber (brown) colour of cocoon. *Antheraea assamensis* is the scientific name of Muga silkworm. The species was first described by Johann Wilhelm Helfer in 1837. It is largely found in Assam in Northeast India where 99% of its production occurs. Muga silk is a variety of wild silk geographically tagged to the state of Assam in India. The silk is known for its extreme durability and has a natural yellowish golden tint with a shimmering, glossy texture. It was previously reserved for the use of royalty. From time immemorial many ethnic and tribal groups have produced Muga silk.

Uniqueness of Muga Silk:

- It has a natural shining golden colour.
- Muga silk is a stain free fabric.
- Muga silk fabric is the second costliest fabric in the world next to pashmina.
- Muga silk is precious durable, lustrous strongest silk among the all types of natural silk.
- No artificial dye is required.
- Everlasting colour stability. The golden colour is increased after every wash instead of decay of shine.

Muga silk remains a classic item that every woman desires to own, however its traditional outlook, an non-versatility makes the demand a little niche. Nevertheless, the fabric does have a global connect specially in Japan where designers are using it to make 'Kimonos' and other traditional Japanese dresses.
